

DMA PLATFORM

Award-winning fully-managed and hosted order entry and execution infrastructure that simplifies the complexity of accessing global liquidity

FAST FACTS

DMA Platform

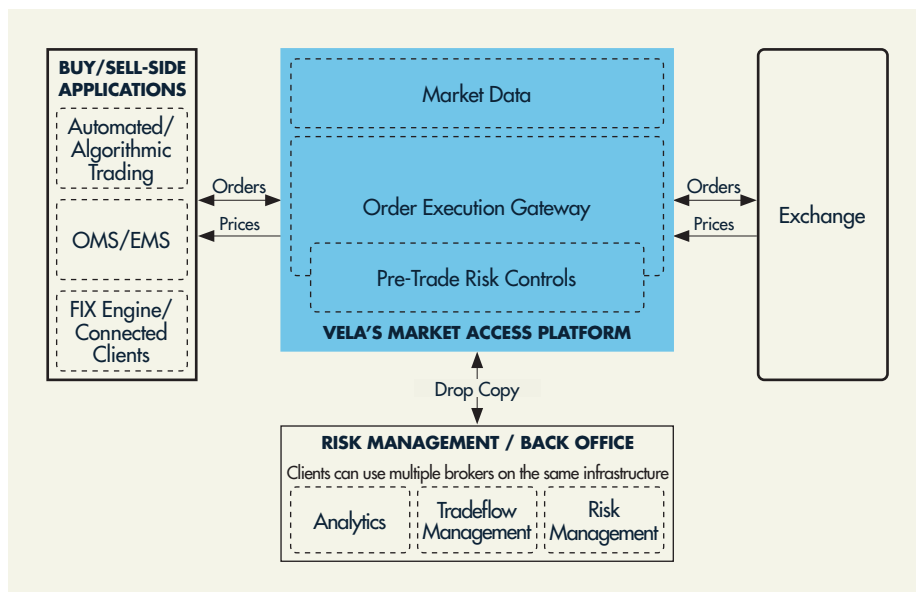

- Built for speed to help achieve quality execution and superior fill ratios
- Quick access to new markets as required with support for 40+ global listed derivatives and fixed income venues via a single API
- Meets the trading needs of buy-side firms and sell-side brokers
- Deployed and available in major exchange co-location sites globally
- Broker neutral and can be integrated with most trading screens and back-office solutions
- Onboarded by 20+ brokers and clearing firms
- Client-side APIs include FIX 4.4 and 5.0 and Vela API
- Vela API is a multithreaded and asynchronous binary API designed for speed

Risk Management

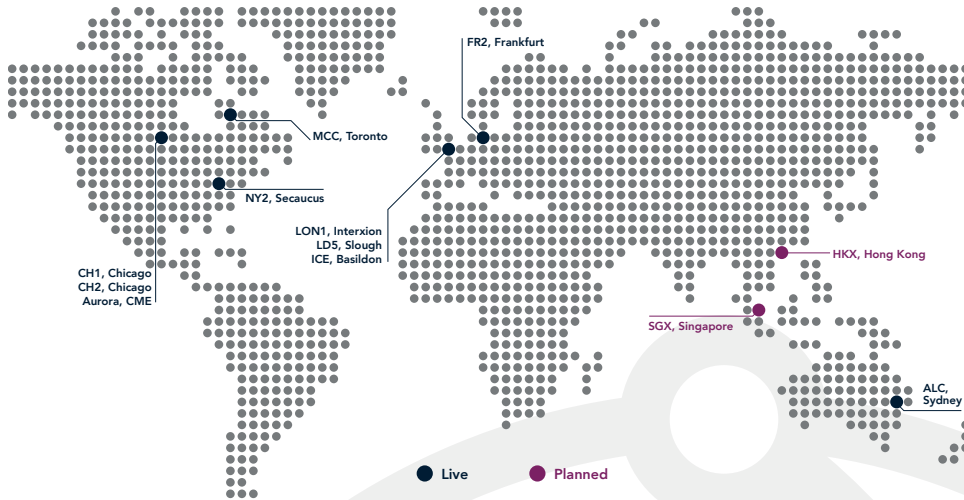

- Central risk management API and screen for low latency pre- and post-trade risk checks
- Brokers can manage risk and order flow with tiered limit controls for brokers, clearing firms, and trading firms
- Order and trade FIX drop copies, allowing sponsored access partners to monitor in real time
- Kill switch for immediate cancels at trader and firm levels
- FIX Drop Copies are compliant with MiFID II

SOLUTION OVERVIEW

- Vela's DMA Platform is a fully-managed and hosted order routing solution providing ultra-low latency market access while reducing cost of ownership and time-to-market.
- All gateways are deployed in exchange co-locations to support ultra-low latency trading and direct market access.
- All infrastructure components are designed to minimize latency with the full end-to-end stack tuned for performance.
- The DMA Platform simplifies your exchange connectivity and order routing through one unified API.
- Full risk management system provides regulatory compliant controls with support for MiFID II and SEC Rule 15c3-5.
- Brokers and sell-side institutions are onboarded to the risk API in order to fully manage buy-side client order flow on pre-trade basis.
- Clients can also manage risk on their own order books within the confines of the broker-imposed limits.
- All components are fully managed by Vela's award-winning managed services team including all bug fixes, upgrades, and exchange-driven changes.
- Vela operates a follow-the-sun support model with hubs in New York, Belfast, London, and Manila to ensure subject matter experts are available 24x7 and production impacting issues can be worked on until resolution.

GLOBAL PRESENCE

ABOUT VELA

Vela is a leading independent provider of data and execution technology for global multi-asset electronic trading.

Our software enables clients to rapidly access global liquidity, markets, and data sources for superior execution. We help firms successfully differentiate and innovate in an ever-changing, increasingly regulated and fiercely competitive landscape, while also reducing total cost of ownership.

Vela's market data, execution and automated trading software deliver a unique, ultra-low latency technology stack to simplify and streamline electronic trading. We leverage the latest innovations in technology to deliver cutting-edge performance, features and reliability. Our modular stack provides access to a comprehensive set of trading data and risk APIs and can be delivered "as-a-Service" from multiple co-location data centers globally.

With access to more than 250 venues, Vela provides global coverage across all major asset classes. Clients are supported by an award-winning team of technical and business experts available 24x7 from our multiple offices in the US, Europe, and Asia. Vela's clients include traders, market makers, brokers, banks, investment firms, exchanges, and other market participants.
